The authors regret an error in the in-text citations and referencing of a source. The Master's thesis, “The Dairy Paradox: A qualitative analysis of the use of coping strategies for dairy consumption of Dutch consumers” by Kunze (2022) was incorrectly attributed to multiple authors (i.e., cited and referenced as Kunze et al., 2022) and the thesis title was incomplete in the reference list.

The correct reference is: Kunze, S. (2022). The Dairy Paradox: A qualitative analysis of the use of coping strategies for dairy consumption

of Dutch consumers. [Master's Thesis, Wageningen University and Research]. WUR eDepot <https://edepot.wur.nl/586821>.

Additionally, all in text citations that appeared as “Kunze et al. (2022)” in the article should have instead been presented as “Kunze (2022)”. As acknowledged throughout the article, Kunze (2022) was an influential source for this research and informed our development of the candidate items for the *Necessary* subscale.

The authors would like to apologise for any inconvenience caused.
